**Subject:** RE: Buffalo Valley Compressor Station (2RP-3817) Backfilling Request

RE: DCP \* Buffalo Valley Compressor Station \* **2RP-3817** \* Facility Closure

Brian,

Your request to backfill at the above referenced facility is approved.

Mike Bratcher  
NMOCD District 2  
811 South First Street  
Artesia, NM 88210  
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

**Subject:** RE: Buffalo Valley Compressor Station (2RP-3817) Backfilling Request

Mr. Bratcher,

I just wanted to check in regarding the backfilling request, below, for the Buffalo Valley Compressor station that was submitted on 8/22/17. We would like to perform backfilling and subsequent reseeding activities soon to take advantage of the Fall growing season. At your earliest convenience, please advise.

Thank you,

Brian Humphrey

**Subject:** Buffalo Valley Compressor Station (2RP-3817) Backfilling Request

Mr. Bratcher,

Tasman on behalf of DCP Midstream would like to request permission to perform backfilling and compaction activities at the Buffalo Valley Compressor Station (2RP-3817) with approximately 1,800 cubic yards of treated soil. Eighteen (18) confirmation soil samples were collected from the treated material and I have included the laboratory analytical report for your reference. All 18 samples were below laboratory detection limits and NMOCD standards for BTEX and GRO and below NMOCD standards for DRO in 15 of the samples. Three samples were very slightly above standards for DRO with concentrations of 104 mg/kg, 111 mg/kg, and 113 mg/kg.

Should you have any questions, or if you would like to get on a quick call to discuss these activities, please let me know.

Thank you,

Brian Humphrey
