Crystal,

It was great meeting you as well. I will be compiling an inspection report and will have those meter results in that report. That inspection report will be shared with the different agencies as requested, as the finalized report is a public document. If Jim has a specific/immediate question, please feel free to call me. My contact information is below.

Also, it is my understanding that when the company takes samples along the Delaware river and Pecos River there will be some sampling conducted in the sensitive area, including the BLM lands in New Mexico. Jim, I believe you are working with the company on finalizing a list of constituents for testing for the water samples, I have seen what Stuart from Cimarex was thinking about as far as what to test for, but please let me know what your final list will include. I would like to verify that the sampling is consistent with EPA compliance with the Clean Water Act (CWA).

I am traveling today, but am responsive on my phone through approximately 1:00 PM CST. If you need further assistance and am not able to reach me, you may reach out to Willie Lane, my supervisor, at (214) 665 – 8460. I look forward to continue to work with you all on this matter.

Thank you,

Jeanne Eckhart

Good morning,

Thanks Jeanne for keeping me in the loop. It was really great getting meet you yesterday. I have spoken with my Environmental Bureau Chief (out of Santa Fe), Jim Griswold, and he asked if I could request in any way shape or form a copy of your YSI meter results from the water testing efforts you conducted yesterday.

I hope for safe travels for you and I look forward to working with you.

Thank you again Jeanne,

Crystal Weaver

Subject: Thursday Site Visit in Culberson County, Texas and NM area

Good Afternoon,

I am emailing briefly to follow up on earlier conversations I had with several different agencies and representatives regarding a spill that was released into the Delaware River in Texas and New Mexico. There are many different agencies involved and I have added the Point of Contacts (POC) from each to this email thread as appropriate. Please let me know if there is an additional representative that I am missing. I will also reach out to the Texas RRC, as I did not get the POCs email today.

I wanted to inform you all that I will be on site during the site visit the company has planned on Thursday 08/10/2017 and appreciate Cimarex for setting up this visit during their response efforts. I will be in Midland, Texas tomorrow (Wednesday) at 2PM to meet with Cimarex representatives, please let me know if you would like to attend. Otherwise, I look forward to meeting you during the

site visit, if you are able to come, and inspection and wanted to make sure you had my contact information (see below) if needed.

Thank you,
