OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mike,

Please see the attached closure report for the Bridger Cedar Canyon 22 CTB. This was a release from a Bridger truck onto an Oxy well pad. We excavated the impacted area per OCD guidelines and collected confirmation samples. All of the confirmation samples were below NMOCD RRAL's. Let me know if you have any questions or concerns.

Respectfully,
