---

Crystal,

I am requesting acknowledgement of completion/closure on the clean-up portion of the spill, not the stockpile or disposal of the stockpile.

I am happy to get an additional sample from the stockpile...based on our recent summer heat and the good amount of rain that has been received, I am quite sure the concentrations have attenuated. If concentrations have not decreased properly, I think we will just send the stockpile for disposal. As far as a sample(s): Do you want one composite sample (what was previously collected), or a specific number of grab samples? Bear in mind that this is a relatively small stockpile—50 cubic yards or less.

Thanks,

Aaron Pachlhofer, P.G.

**Subject:** RE: Fasken El Paso Federal No. 12 closure request

Hello all,

I am resending this out cause Jim Amos and Shelly Tucker were not included on the original send and they should have been.

Thank you,

Fasken Oil & Ranch \* El Paso Fed 12 \* **2RP-4155** \* DOR: 3/25/17

Aaron,

I discussed this one with Mike since I was not involved in some the details you two went over (I never got a copy of the site map for this one). As it has been stated RRAL Site Ranking for this location is 10. Therefore making target goals for TPH at 1000ppm (Benzene 10ppm and Total BTEX 50ppm). It appears according to your attachment requesting closure that you have not achieved this number within your bioremediation pile. So at this time request for closure at this site is denied. Also more than one sample on a bio remediation pile will be required.

If you have any questions or concerns please contact myself or Mike Bratcher here at the District II OCD Office.
