Mike,

Doc Oberding and I had discussed the soil stockpiles remaining at both of these tank batteries, since the concentrations in the excavations were below limits. Two samples from each stockpile were collected. The lab reports for each are attached. I have also attached the original closure requests that I sent to Crystal.

I would like to return the pea gravel to the inside of the firewall at the Gossett.

I would like to allow our operations personnel to re-use the stockpile at the El Paso Federal No .12 at their discretion.

Please call or email with any questions,
