RE: Linn Energy * H.E. West B 30 * **2RP-4375** * DOR: 9/2/17

Shane,

Your proposal for remediation of the above referenced release is approved with the following:

Liner placement must be a minimum of 4' below natural grade. Based on the proposal, it is OCD's understanding that additional delineation will be performed in the area identified as "Auger Hole 1". Federal sites will require like approval from BLM. Please copy both agencies at time of submittals and reference the 2RP number on all correspondence. Also note, the photos provided in this proposal do not appear to be for this release. Provide notification once remedial activities have been scheduled.

If you have any questions or concerns, contact me.

Mike Bratcher
NMOCD District 2

575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mike

Attached are two delineation/remediation scope of work for the LINN Energy's Barclay State and HE West B #30 sites.

Please review and let me know if the delineation and the basic scope of work for remediation is acceptable.

Thanks
