Reference: State D SWD N-16-20s-24e API: 30-015-21572

Jerry,

As per our phone conversation on 3/17/2006, verbal approval was given to treat the release site at the above referenced location with a spray solution of water and Microblaze. Realizing some time has passed since this incident occurred, could you please provide me with an update on remedial actions that have taken place to date? Please provide an update at your earliest convenience, but no later than 6/28/06.

Thank you in advance.

Sincerely,

Mike Bratcher
