Subject: Reportable spill

All,

On 9/16/2018 at 8:30 a.m. a release was discovered at the Cedar Lake Federal CA 737H (API # 30-015-40901). The well is located in UL A Sec 7 17S 31E (GPS 32.8543243 -103.9039078). The source of the release was a 2 inch tee at the well head resulting in the loss of 40 barrels of water and 20 barrels of oil with 35 barrels of water and 15 barrels of oil recovered. The well was shut in and a vacuum truck was dispatched to pick-up standing fluid. The release affected the well pad and pasture south west of the pad and an overspray area north east of the pad. A berm was installed on the south west corner of the pad to keep any further impacts to the pasture from the lease pad. Please let me know if you have any questions or wish to discuss. Thanks and have a good day.
