Subject: 2RP-3980 Sampling Proposal
Date: Wednesday, February 7, 2018 10:03:59 AM

Mike,

RXSoil is requesting your approval for our sampling plan for the remediation of XTO's PLU 078. This sampling plan identifies sample points throughout our treatment cells to be sent for third-party lab testing to be used for closure (when all contamination levels are below thresholds). In addition to these points, we will also supplement with field screenings throughout our treatment to drive our real-time reporting.

The first map, "Excavation Samples", includes confirmation samples to ensure all contaminated material has been excavated.

The second map, "Remediation Samples", shows where we will sample during remediation to ensure all material is below all thresholds.

This email serves to request your approval for our testing plans. Feel free to reach out with any questions or comments.

Thanks,
Zach
