If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* Fluid over ranged production vessels causing fluid to be released out of the flare stack. An environmental response crew was dispatched to the location and began to scrape up the saturated soils; micro blaze was also applied to the vegetation.		
Describe Area Affected and Cleanup Action Taken.* The fluid released affected the pasture to the north/northwest of the flare area. An environmental response crew was dispatched to the location and began to scrape up the saturated soils near the flare; micro blaze was applied to the vegetation within the spray area.		
The impacted soil was excavated. Confirmation soil samples were collected from the release area and excavation between June 26, 2018 and June 29, 2018. Laboratory analytical results for the confirmation soil samples indicate BTEX, TPH, and chloride concentrations are compliant with NMOCD remediation action levels. A Closure Request Report is attached describing all field activities. XTO requests no further action for this release.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
