Subject: 2RP-4947 RE: [EXT] Holly Energy Partners-Pump Colgate Osage Lease Report-REVISED
Date: Thursday, October 25, 2018 6:40:00 PM

Hello Ms. Hodges,

OCD has received the closure report, thank you! At this time this closure request is denied for the following reasons:

1. The area is in a High Karst region per BLM map, therefore remediation is to DTW < 50' section of Table 1. Chloride limits are: 600 mg/kg, TPH 100 mg/kg and BTEX is 50 mg/kg.
2. There is an OSE well within 500' which lists groundwater at 60'.
3. Because this is an unknown spill a full delineation may be required.
4. Areas around SP1, 2 & 3 are too high for TPH and the area at the SP3 North Wall suggests horizontal delineation is not complete.
5. No C-141 was included.

Please let me know if you have any questions, or need further assistance.

Best Regards,

Maria Pruett
