District RP	1RP-5407
Facility ID	fAB1908656217
Application ID	pAB1908656303

Release Notification

Responsible Party

Responsible Party: Solaris Water Midstream	OGRID 371643
Contact Name: Rob Kirk	Contact Telephone: O (432) 203-9020, C (469) 978-5620
Contact email: rob.kirk@solarismidstream.com	Incident # (assigned by OCD)
Contact mailing address: 907 Tradewinds Blvd, Suite B, Midland, Texas 79706	

Location of Release Source

Latitude 32.52535°

Longitude -103.52107°

(NAD 83 in decimal degrees to 5 decimal places)

Site Name: Okeanos SWD	Site Type: Discharge line
Date Release Discovered: 2/23/2019	API# (if applicable)

Unit Letter	Section	Township	Range	County
M	36	20S	34E	Lea

Surface Owner: ☐ State ☐ Federal ☐ Tribal ☒ Private (Name: Patrick Simms)

Nature and Volume of Release

Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below)

<input checked="" type="checkbox"/> Crude Oil	Volume Released (bbls) 5	Volume Recovered (bbls) 0
<input checked="" type="checkbox"/> Produced Water	Volume Released (bbls) 15	Volume Recovered (bbls) 0
	Is the concentration of dissolved chloride in the produced water >10,000 mg/l?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input type="checkbox"/> Condensate	Volume Released (bbls)	Volume Recovered (bbls)
<input type="checkbox"/> Natural Gas	Volume Released (Mcf)	Volume Recovered (Mcf)
<input type="checkbox"/> Other (describe)	Volume/Weight Released (provide units)	Volume/Weight Recovered (provide units)

Cause of Release: Pipeline flange bolts became loose allowing flowback fluid to be released from the connection. A dirt contractor working in the area discovered the leak and initially excavated impacted surface soil proximal to the release point and placed on plastic at the site. Upon discovery, there were no free liquids standing observed. In addition, an initial release assessment determined there was surface soil staining in an area that measured approximately 760 ft. long (mostly a narrow animal path) and varies from 8-35 ft. wide, which affected approximately 26,300 sq ft of pastureland. Final remediation will follow the NMOCDC recommended guidelines for leaks and spills.

Was this a major release as defined by 19.15.29.7(A) NMAC? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, for what reason(s) does the responsible party consider this a major release?
If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?	

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

<input checked="" type="checkbox"/> The source of the release has been stopped. <input checked="" type="checkbox"/> The impacted area has been secured to protect human health and the environment. <input type="checkbox"/> Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices. <input type="checkbox"/> All free liquids and recoverable materials have been removed and managed appropriately.	
If all the actions described above have <u>not</u> been undertaken, explain why: Initial observations indicate that released materials and free liquids were absorbed into surface soils within approximately 1 to 1.5 ft of the surface throughout the aerial extent of the release. The saturated surface soil proximal to release point was consolidated on plastic on the day the release was discovered. The stockpile is estimated to consist of approximately 10 cubic yards of affected materials.	
Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
