**Attachments:** Deferral Approval - COG - Graham Cracker 2 State #1H (2RP-4954) 5.28.19.pdf

Clair,

Tetra Tech's workplan approval for the above referenced release, requests areas impacted by the release be deferred for remediation until site abandonment. The area requested for deferral is identified on the site map as "WSW-1". The area has been delineated and documented in the report. At this time, OCD approves this request. Please proceed with the remediation and disregard sending the closure until all remediation has been accomplished in the future including the deferred area. The workplan has been accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. This is a State site and will require like approval from SLO.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
