Good afternoon Amy,

In the body of the email it says that this release involved "fluids at the referenced facility" but when I read the initial C-141 I am having a hard time deciphering if the fluids were lost on or off pad? Please advise?

Thank you,

Crystal Weaver

"3 percent of the water on this planet is considered freshwater. Of that 3 percent only 1 percent is considered accessible, meaning the majority of the remaining 2 percent is trapped in glaciers or snowfields." - National Geographic

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not re-vegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Good Morning,

Attached is an initial form C-141 including spill calculations detailing a release of fluids at the referenced facility. Please contact us any time with questions or concerns. Thank you.

Respectfully,

Amy C. Ruth
