Subject: [EXT] RE: Deferral Denied - Longfellow Energy - State 20B Battery (2RP-5158) - 11.5.18

Hi Robert,

The company coordinating the testing did provide notice of our sampling, but I wanted to make sure I replied to this email as well. Soil sampling will take place on Tuesday Oct 1 and likely continue on Wednesday Oct 2.

Thanks,

David Cain

David,

Yes, please give us 48 hour notice before you sample. If we can't make it out there, please include all of the sampling results in a table.

Thank you,

Robert J Hamlet

Hello Robert,

We've found someone in New Mexico who has a power boring unit that should work to get samples that fully delineate the vertical extent of the release. The sampling will likely get done in the last two weeks of August.

Do you need notification of the day we plan on doing the work in case the OCD would like to witness?

Thanks,

David Cain

David,

Generally, the Site Assessment/Remediation Plan is due 90 days after the release date. Please expedite the process and keep us informed of your progress.

If this becomes a pattern the OCD will issue a LOV (Letter of Violation) and the LOV will be submitted to OCD's Compliance and Enforcement Bureau for further action.

I don't have a list of local companies that do this type of work.

Please let me know if you have any questions,

Robert J Hamlet

Hello Robert,

We are trying to source out a power auger or drill in order to drill deeper through the caliche pad. I did want to confirm if there is a deadline to submit the deeper samples delineating the vertical extent of the release.

Do you know of local companies that might be able to do the work that we can contact?

Thank you,

Subject: [EXTERNAL] Deferral Denied - Longfellow Energy - State 20B Battery (2RP-5158) - 11.5.18

Cianna,

We have received your Remediation Deferral Request for **2RP-5158 State 20B Battery**, thank you. This Deferral request is denied.

The two bottom samples "SB4-001 @ 3.5'bgs" and "SB5-001 @ 1.5'bgs" in the affected berm are above the required limit for DROs and Chlorides. Please use a power auger or drill to sample deeper. The samples must be under the limit to verify the spill has been vertically delineated before we can approve a deferral.

Please let me know if you have any further questions.

Regards,

Robert J Hamlet

Cianna,

I have included the District 2 Environmental Team in this response and have forwarded your submittal. Going forward please send all OCD District 2 environmental correspondence to the following:

Rob Hamlet: robert.hamlet@state.nm.us
Victoria Venegas: victoria.venegas@state.nm.us

Please continue to copy me as well.

Thank you,

Subject: [EXT] Longfellow Energy - State 20B Battery (2RP-5158) - Deferral Request Report

Hello Mr. Bratcher,

Attached please find the Site Characterization Report and Remediation Deferral Request Report for Longfellow Energy's State 20B Battery facility which experienced a release of produced water and a slight oil skim on November 5, 2018 as a result of a lightning strike – this release was assigned the 2RP-5158 identifier upon being reported to NMOCD. Confirmation soil sampling at the subject site has shown that Longfellow's secondary containment (earthen berm) successfully limited impacts to the area inside of the berm and that the horizontal extent of the release was limited to within the berm area. The scope of vertical delineation sampling within the active well pad was limited due to safety concerns. However, the client's prompt discovery of the release and rapid recovery efforts (including the collection and proper disposal of released fluids) limited impacts to the site as shown in the photographic log and sample data summary included in the attached report. Having reviewed the available data, the site does not appear likely to cause an imminent risk to human health, the environment, or groundwater.

Based on the data provided within this report, Sport Environmental, on behalf of Longfellow Energy, respectfully requests deferral status be granted for this release until the site is no longer active.

If NMOCD would like to discuss any details of this request further, please contact us at (432) 683-1100.

Thank you,

Cianna Logie
