**Subject:** [EXT] WPX Energy - APE Fee 1 Pad Notification  
**Date:** Tuesday, January 21, 2020 9:20:02 AM

---

Good Morning,

Mike, I left you a voice message and thought I would follow it up to the group with an email. This morning, a small hole developed in the flowline at the APE Fee 1 Pad. This well is located just south of Carlsbad. A small hole developed and misted light fluids across the road (701 or S. Thomason Rd.) and onto a neighbors property. The neighbor contacted the emergency services and WPX was notified. We have been speaking with the landowner and are taking necessary steps to clean up his property. In addition, we placed some absorbent down on the road to remove any oil that may be present. An environmental consultant is also on location and we will follow up with an appropriate notification once all the information has been obtained, but I wanted to make sure the NMOCD was aware of the incident.

Please do not hesitate to contact me if anyone has any questions or needs additional information.  
Thank you,  
Bob
