Subject: [EXT] Extension Request (Hooper Battery 2RP-?)

EOG Resources, Inc. respectfully requests a Characterization Plan/Closure Report EXTENSION for the October 30, 2019, release at the Hooper Battery. The a large portion of the area was re-impacted during the second release at the Hooper Battery that occurred on December 18, 2019. Due to the December release impacting an already excavated portion of the October release, sampling activities had to restart from the beginning for the October release. We would like to move the Characterization Plan/Closure Report due date to March 17, 2020, which would be the current date set for the December 2019 release.

Also, I haven't received an RP for either event, would it be possible to assign both releases the same RP number since they are being addressed at the same time?

Thank you,

Chase Settle
