RE: Deadline Extension Nix GP Battery 2RP-5436

Mr. Settle,
OCD approves your requested extension to September 5, 2019 for Nix GP Battery 2RP-5436.
Thank you.

Victoria Venegas
EMNRD
OCD-District II
811 S First St. Artesia

Victoria.Venegas@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] Deadline Extension Nix GP Battery 2RP-5436

Mr. Hamlet and Ms. Venegas,

The Characterization Report deadline for the below listed location is next week, August 5, 2019, however we have already applied a microbial treatment product to the TPH and BTEX impacted soils and would like to request a 30 day extension to submit the Closure Report for the site. Treatment of the soils was conducted on June 12, 2019, with the top 4 feet of impacted soil being excavated and hauled to a disposal facility. The 30 day extension will allow for the treatment product to work for approximately 60 days since removal of the tanks and other equipment was necessary to address the release, which caused a delay in treatment application. We have also sampled all sidewalls and extended the excavation twice to remove impacted soils. The walls will be sampled again during final confirmation sampling of the bioremediated soil to determine that all sidewalls and remaining soils are below Table 1 standards and that chloride is below 600 mg/kg for chloride within the top 4 feet.

Nix GP Battery
Section 22, T18S-R26E (UL O)
Eddy County, New Mexico
2RP-5436

Thank you,

Chase Settle, M.S.
