Re: Lobo to Eddy State Line Release Incident #NRM2005137772 – 90-day time extension request

Following the guidance given by the March 20, 2020 “Oil Conservation Division Operations During Declared Public Health Emergency”, we respectfully request an extension of 90 days to prepare a remediation plan/or to complete the remediation for this release.

Given the current economic working environment during the public health emergency, it is difficult to connect with consultants and contractors and for those companies to be responsive in this working environment. In addition to our internal workforce reductions, many of these companies have also experienced significant layoffs and getting responsive and timely quotations, scopes of work, and proposals is problematic.

We look forward to your positive response to this request. Please let me know of any questions or comments.

Best regards,
