**Subject:** Remediation Conditional Approval - ConocoPhillips - Baish A Battery - (1RP-5641)  
**Attachments:** Remediation Conditional Approval - ConocoPhillips - Baish A Battery - (1RP-5641) 1.10.20.pdf

Christian,

We have received your Workplan/Remediation Proposal for **1RP-5641 Baish A Battery**, thank you. This Workplan/Remediation proposal is conditionally approved.

- All off pad areas must contain a minimum of 4 feet non-waste containing uncontaminated, earthen material with chloride concentrations less than 600 mg/kg and TPH less than 100 mg/kg. In the pasture area, 4 feet below the ground surface, soil contamination limits revert back to Table 1 "Closure Criteria for Soils Impacted by a Release" included in the spill rule <http://164.64.110.134/parts/title19/19.015.0029.html>
- Please ensure soil sample point SP-4 is excavated until Chlorides are below 10,000 mg/kg and TPH (GRO + DRO) is below 1,000 mg/kg
- Please also excavate SP-7 to 4' below ground surface to meet the chloride limit of 600 mg/kg and 100 mg/kg for TPH in the pasture area.

The OCD Payment Portal is inadvertently scrubbing print from some Adobe PDFs that have been submitted. The OCD is aware of the problem and trying to fix the issue. Please, sign/date the attached Remediation page and sent it back to my e-mail address. We will archive the document in the well file. Sorry, for the inconvenience.

Please let me know if you have any further questions.

Thank you,

Robert J Hamlet
