NAB1910937075 MORRIS BOYD 26 FEE COM #001H @ 30-015-38962

Mr. Mathews,

The OCD has denied the submitted Closure Report C-141 for incident # NAB1910937075 MORRIS BOYD 26 FEE COM #001H @ 30-015-38962 for the following reasons:

- The OCD does not accept averaging data to determine DTGW. The closure criteria for this site is DTGW < 50'.
- Soil samples were collected from only 9 points within the excavation spanning an area of more than 13000 square feet (Figure page 35). Please see 19.15.29.12 D. Closure Requirements. Each sample should not represent more than 200 square feet unless a sampling plan has already been submitted to and approved by the division. If you have an approved sampling plan, please include it in the report.
- Include a confirmation scaled sample map, with the sidewall sample points and bottom sample points clearly marked, in the report. Make sure that the confirmation samples ID matches the name on the sample diagram.

The Denied C-141 can be found in the online image file. Please review and make the required correction prior to resubmitting through the fee portal.

Thank you,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
