Subject: Deferral Approval - COG - Wild Cap St Com #1 - (Incident #NRM2000851241)
Attachments: Deferral Approval - COG - Wild Cap St Com #1.pdf

COG's deferral requests that Impacted soil affected above the NMOCD Closure Criteria and/or the NMOCD Reclamation Standard remaining in-situ will be remediated upon decommissioning the facility. COG does not believe deferment will result in imminent risk to human health, the environment, or groundwater.. The areas requested for deferral are identified on the site map as the soil beneath and adjacent to the on-site heater treater and associated piping. The areas have been delineated and documented in the report. At this time, OCD approves this request. The Deferral Request and C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. This is a State site and will require like approval from SLO.

Please let me know if you have any questions.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
