1.0 INTRODUCTION AND BACKGROUND

On behalf of COG Operating, LLC (COG) and Ready Oilfield Service, Inc. (Ready Oilfield), TRC Environmental Corporation (TRC) has prepared this *Remediation Summary and Site Closure Request* for the produced water Release Site known as Jack Federal #004H (Flowline). The Release Site is located approximately thirteen (13) miles southwest of Malaga in Eddy County, New Mexico in Unit Letter C, Section 31, Township 25 South, Range 27 East, NMPM. The Release Site GPS coordinates are N 32.09125° W 104.23278°. The Release Site is located on property owned the The United States Department of the Interior and administered by the Bureau of Land Management (BLM). A copy of New Mexico Oil Conservation Division (NMOCD) Release Notification (Form C-141) is provided with this *Remediation Summary and Site Closure Request* as Appendix F. A topographic location map and aerial map are provided as Figure 1 and Figure 2, respectively. Photographic documentation is provided as Appendix A.

On August 13, 2019, a third-party contractor (Ready Oilfield Services, LLC) struck a COG flowline with a backhoe, resulting in the release of fifteen (15) barrels (bbls) of produced water. During initial response activities, a vacuum truck recovered ten (10) bbls of produced water. The Release was located on a lease road and pipeline right-of-way. Following the initial response activities, the flowline was repaired. A New Mexico Oil Conservation Division (NMOCD) Form C-141 was prepared and submitted to the NMOCD on August 15, 2019.

A groundwater database maintained by The New Mexico Office of the State Engineer (NMOSE) indicated no water wells were located within a one-half (0.5) mile radius of the release point. The NMOSE database did identify a water well (C04079) in Section 33, Township 25 South, Range 27 E, approximately two (2) miles east of the Release Site. The NMOSE database indicated the depth to water at the water well was twenty (20) feet below ground surface. Depth to Groundwater information is provided as Appendix B.

Based on the depth to groundwater at the Jack Federal #004H (Flowline), the *NMOCD Closure Criteria for Soils Impacted by a Release* are the most stringent closure criteria listed. The Bureau of Land Management (BLM) publicly available *Karst Potential Map* indicates the Jack Federal #004H (Flowline) Release Site, is located in a “critical karst” area. The BLM Karst Potential Map is provided as Figure 3. Based on the NMOCD Closure Criteria for Soils Impacted by a Release, the Closure Criteria for the Jack Federal #004H (Flowline) Release Site are as follows:

- Benzene - 10 mg/kg
- Benzene, Toluene, ethylbenzene, and total xylenes (BTEX) - 50 mg/kg
- Total Petroleum Hydrocarbons (TPH) – 100 mg/kg
- Chloride – 600 mg/kg

2.0 SUMMARY OF EXCAVATION ACTIVITIES

On August 15, 2019, excavation activities commenced at the COG Jack Federal #004H (Flowline) Release Site and excavated soil was stockpiled on-site on a plastic liner pending transportation to an NMOCD approved Landfill.

On August 17 and 19, 2019, thirty-eight (38) soil samples (F-1 @ Sur, F-2 @ Sur, F-3 @ Sur, F-4 @ Sur, F-5 @ 1', F-6 @ 2', WSW-6 @ 2.5', ESW-6 @ 1', F-7 @ 1', F-8 @ Sur, F-9 @ Sur, F-10 @ Sur, F-11 @ 4', WSW-11 @ 2.5', NSW-11 @ 2.5', ESW-11 @ 2.5', F-12 @ 9", F-13 @ 1.5', SSW-13 @ 6", NSW-13 @ 6", F-14 @ 9", F-15 @ 2', NSW-15 @ 6", SSW-15 @ 1', F-16 @ 2', NSW-16 @ 6", SSW-16 @ 1', F-17 @ Sur, F-18 @ 1.5', F-19 @ 2', NSW-19 @ 1', F-20 @ 1.5', SSW-20 @ 1', F-21 @ 9", F-22 @ 9", F-23 @ 9", F-24 @ 9", and F-25 @ 9") were collected from the excavation floor and sidewalls and submitted to Permian Basin Environmental Labs (PBE Labs) in Midland, Texas. The soil samples were analyzed for concentrations of benzene, toluene, ethylbenzene, and xylene (BTEX) using Method SW 846-8021b, Total Petroleum Hydrocarbon (TPH) using Method SW 846-8015M, and Chloride using EPA Method 300.0.

The analytical results indicated benzene concentrations were less than the applicable laboratory reporting limit (RL) for all thirty-eight (38) soil samples. The analytical results indicated BTEX concentrations ranged from less than the applicable laboratory RL for soil samples (F-2 @ Sur, F-3 @ Sur, ESW-6 @ 1', F-7 @ 1', F-11 @ 4', ESW-11 @ 2.5', F-15 @ 2', NSW-16 @ 6", SSW-16 @ 1', F-18 @ 1.5', F-21 @ 9", F-22 @ 9", F-23 @ 9", F-24 @ 9", and F-25 @ 9") to 0.21380 mg/kg for soil sample F-17 @ Sur. The analytical results indicated TPH concentrations were less than the applicable laboratory RL for all thirty-eight (38) soil samples. Chloride concentrations ranged from 3.27 mg/kg for soil sample ESW-6 @ 1' to 563 mg/kg for soil sample F-19 @ 2'.

On October 17, 2019, additional excavation activities were completed and fourteen (14) soil samples (ESW-5 @ 6", SSW-6 @ 4", ESW-13 @ 9", WSW-16 @ 6", WSW-7 @ 3", SSW-19 @ 10", WSW-20 @ 9", F-26 @ 1.5', ESW-18 @ 9", ESW-21 @ 4", ESW-22 @ 5", NSW-23 @ 5", SSW-24 @ 5", and WSW-25 @ 5") were collected and submitted to the laboratory for analysis.

The analytical results indicated benzene, BTEX, and TPH concentrations were less than the applicable laboratory RL for all fourteen (14) soil samples. Chloride concentrations ranged from 2.51 mg/kg for soil sample SSW-6 @ 4" to 14,100 mg/kg for soil sample WSW-7 @ 3". The analytical results indicated the areas represented by soil samples ESW-5 @ 6", WSW-7 @ 3", and ESW-18 @ 9" exhibited chloride concentrations of 2,350 mg/kg, 14,100 mg/kg, and 820 mg/kg, respectively and warranted additional excavation.

On December 19, 2019, impacted soil represented by soil samples ESW-5 @ 6", WSW-7 @ 3", and ESW-18 @ 9" was excavated laterally and added to the impacted soil stockpile. Following the excavation activities, three (3) soil samples (WSW-7A @ 3", ESW-5A @ 6", and ESW-18A @ 9") were collected and submitted to the laboratory.

The analytical results indicated benzene, BTEX, and TPH concentrations were less than the applicable laboratory RL for all three (3) soil samples. Chloride concentrations ranged from 148 mg/kg for soil sample ESW-5A @ 6" to 425 mg/kg for soil sample ESW-18A @ 9".

An Excavation and Sample Location Map is provided as Figure 4. An Excavation and Sample Location Map with aerial photographic imagery is provided as Figure 5. A Summary of Concentrations of Benzene, BTEX, TPH and Chloride is provided as Table 1 and chloride field test results are provided in Appendix C. Laboratory Analytical Reports are provided as Appendix D. A copy of the NMOCD (*Request for Approval to Accept Solid Waste*) Form C-138 is provided as Appendix E.

On May 6-7, 2020, approximately one hundred eighty (180) cubic yards of impacted soil was transported under manifest to the Lea Land disposal facility located northeast of Carlsbad, New Mexico. Backfill material was purchased from Lea Land and the Site was contoured to fit the local topography. Copies of the Lea Land Disposal Manifests will be available upon request.

3.0 SITE CLOSURE REQUEST

Based on the analytical results of confirmation soil samples obtained from the floor and sidewalls of the excavation, TRC recommends COG provide the NMOCD and BLM a copy of this Remediation Summary and Site Closure Request and request the NMOCD and BLM grant soil closure status to the Jack Federal #004H (Flowline).

4.0 LIMITATIONS

TRC has prepared this Remediation Summary and Site Closure Request to the best of its ability. No other warranty, expressed or implied, is made or intended.

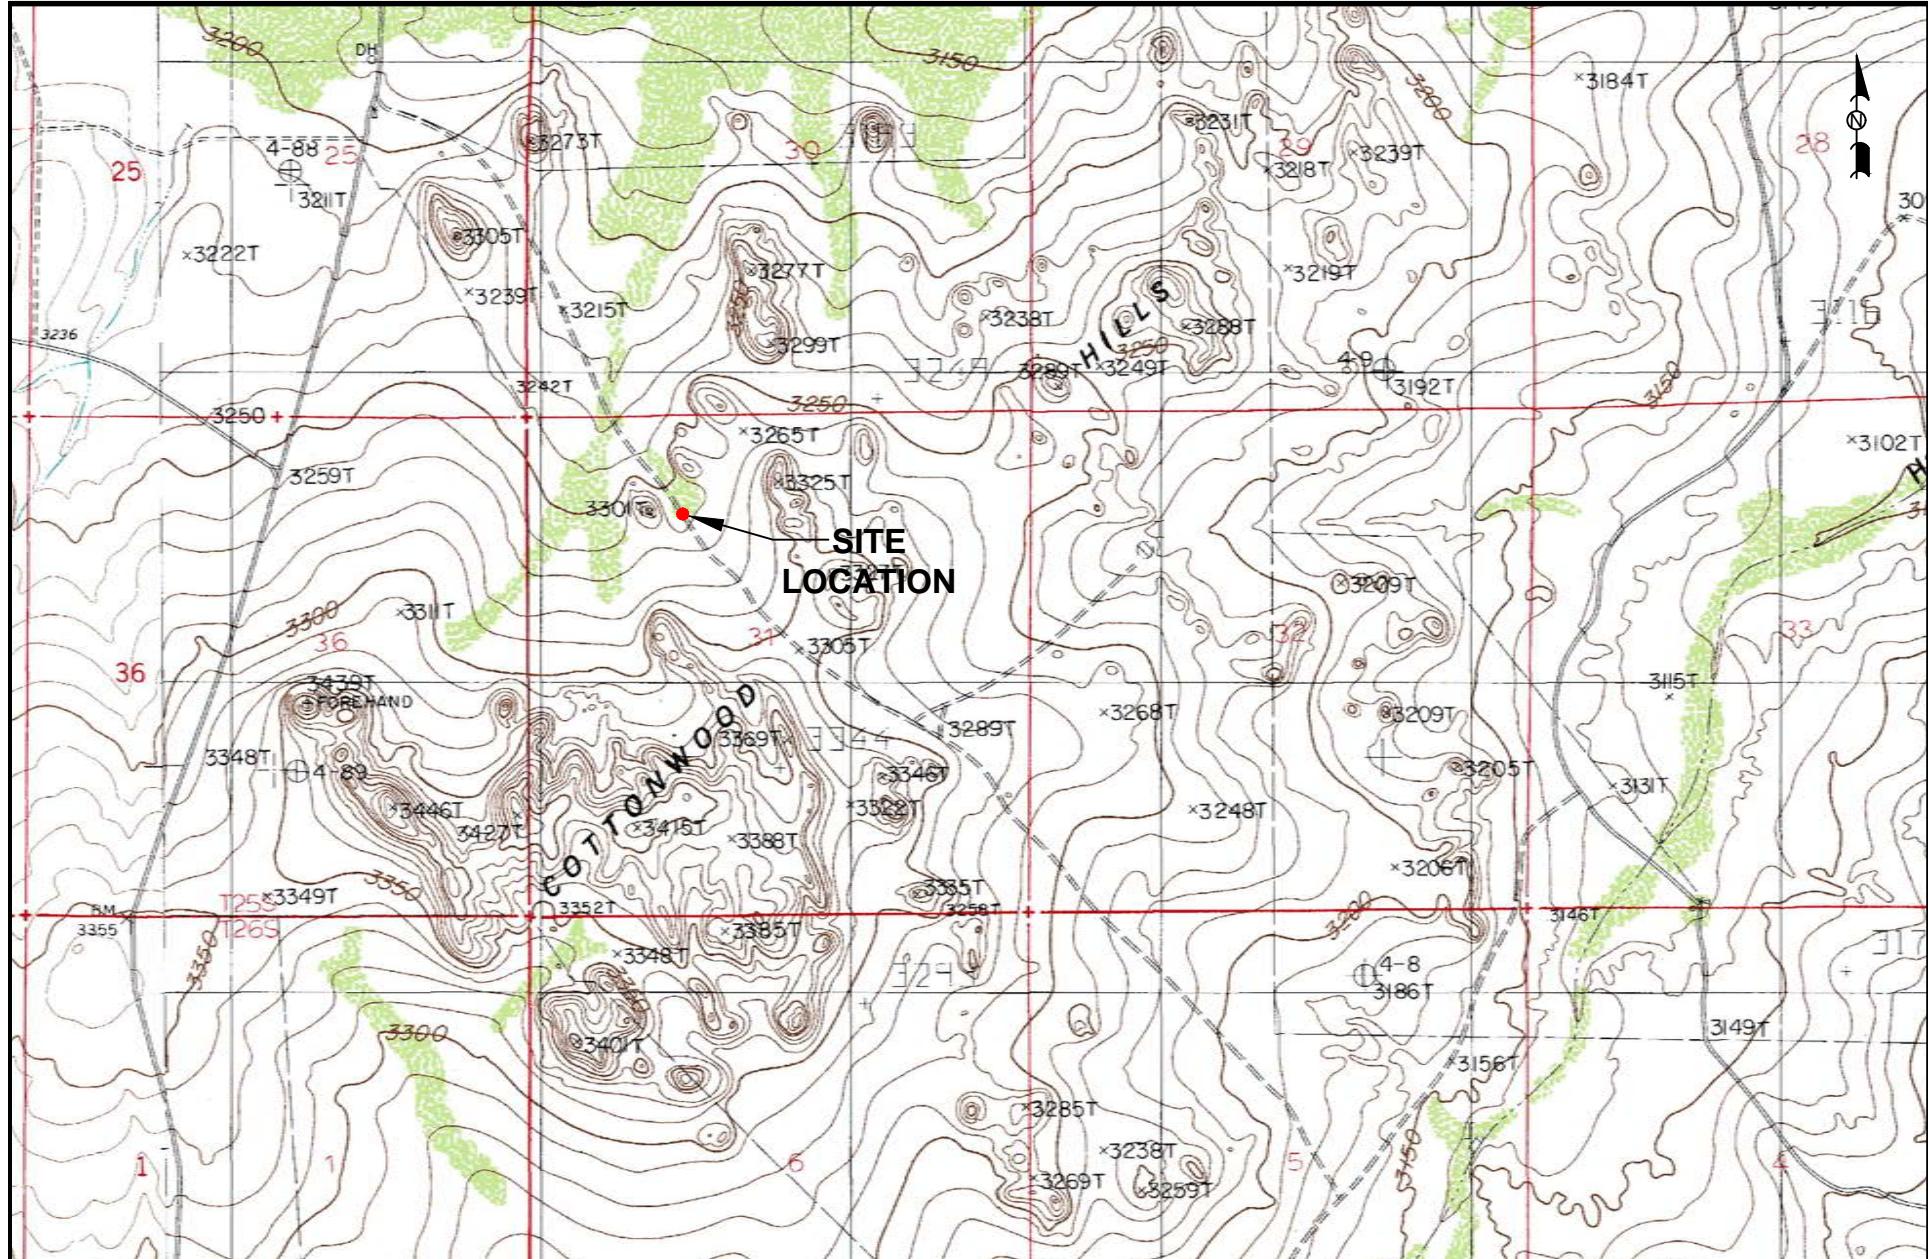

TRC has examined and relied upon documents referenced in the report and has relied on oral statements made by certain individuals. TRC has not conducted an independent examination of the facts contained in referenced materials and statements. We have presumed the genuineness of the documents and that the information provided in documents or statements is true and accurate. TRC has prepared this report in a professional manner, using the degree of skill and care exercised by similar environmental consultants. TRC also notes that the facts and conditions referenced in this report may change over time and the conclusions and recommendations set forth herein are applicable only to the facts and conditions as described at the time of this report.

This report has been prepared for the benefit of COG and/or Ready Oilfield. The information contained in this report, including all exhibits and attachments, may not be used by any other party without the express consent of TRC, and/or COG, and/or Ready Oilfield.

Notes and Definitions

S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate.
ROI	Received on Ice
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
BULK	Samples received in Bulk soil containers
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
LCS	Laboratory Control Spike
MS	Matrix Spike
Dup	Duplicate

Report Approved By:  Date: 9/5/2019

Brent Barron, Laboratory Director/Technical Director

Permian Basin Environmental Lab, L.P.

The results in this report apply to the samples analyzed in accordance with the samples received in the laboratory. This analytical report must be reproduced in its entirety, with written approval of Permian Basin Environmental Lab.

Notes and Definitions

S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate.
ROI	Received on Ice
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
BULK	Samples received in Bulk soil containers
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
LCS	Laboratory Control Spike
MS	Matrix Spike
Dup	Duplicate

Report Approved By:  Date: 10/30/2019

Notes and Definitions

ROI	Received on Ice
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
BULK	Samples received in Bulk soil containers
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
LCS	Laboratory Control Spike
MS	Matrix Spike
Dup	Duplicate

Report Approved By:  Date: 12/31/2019

Form C-138
Revised August 1, 2011

*Surface Waste Management Facility Operator
and Generator shall maintain and make this
Documentation available for Division inspection.

REQUEST FOR APPROVAL TO ACCEPT SOLID WASTE

1. Generator Name and Address:	COG Operating, LLC 600 West Illinois Avenue Midland, TX 79701
2. Originating Site:	COG Jack Federal #004H (API # 30-015-42134)
3. Location of Material (Street Address, City, State or ULSTR):	ULT "C", Sec 31, T25S, R27E, Eddy County, New Mexico
4. Source and Description of Waste:	Waste was generated due to a produced water release from a Concho gathering line

Estimated Volume 150 yd³ / bbls Known Volume (to be entered by the operator at the end of the haul) yd³ / bbls

5. GENERATOR CERTIFICATION STATEMENT OF WASTE STATUS

I, Sheldon Hitchcock, representative or authorized agent for COG Operating, LLC do hereby certify that according to the Resource Conservation and Recovery Act (RCRA) and the US Environmental Protection Agency's July 1988 regulatory determination, the above described waste is: (Check the appropriate classification)

- RCRA Exempt: Oil field wastes generated from oil and gas exploration and production operations and are not mixed with non-exempt waste. *Operator Use Only: Waste Acceptance Frequency* Monthly Weekly Per Load
- RCRA Non-Exempt: Oil field waste which is non-hazardous that does not exceed the minimum standards for waste hazardous by characteristics established in RCRA regulations, 40 CFR 261.21-261.24, or listed hazardous waste as defined in 40 CFR, part 261, subpart D, as amended. The following documentation is attached to demonstrate the above-described waste is non-hazardous. (Check the appropriate items)
- MSDS Information RCRA Hazardous Waste Analysis Process Knowledge Other (Provide description in Box 4)

GENERATOR 19.15.36.15 WASTE TESTING CERTIFICATION STATEMENT FOR LANDFARMS

I, Sheldon Hitchcock, representative for COG Operating, LLC do hereby certify that representative samples of the oil field waste have been subjected to the paint filter test and tested for chloride content and that the samples have been found to conform to the specific requirements applicable to landfills pursuant to Section 15 of 19.15.36 NMAC. The results of the representative samples are attached to demonstrate the above-described waste conform to the requirements of Section 15 of 19.15.36 NMAC.

5. Transporter:

M Mata Trucking, Hobbs, NM

OCD Permitted Surface Waste Management Facility

Name and Facility Permit #: Lea Land LLC – NMOCDF Permit #NM-01-35-0

Address of Facility: Section 32, Township 20 South, Range 32 East, NMPM Lea County, New Mexico

Method of Treatment and/or Disposal:

- Evaporation Injection Treating Plant Landfarm Landfill Other

Waste Acceptance Status:

APPROVED

DENIED (Must Be Maintained As Permanent Record)

Facility ID	
Application ID	

Was this a major release as defined by 19.15.29.7(A) NMAC? <input type="checkbox"/> Yes <input type="checkbox"/> No	If YES, for what reason(s) does the responsible party consider this a major release?
If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?	

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

<input type="checkbox"/> The source of the release has been stopped. <input type="checkbox"/> The impacted area has been secured to protect human health and the environment. <input type="checkbox"/> Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices. <input type="checkbox"/> All free liquids and recoverable materials have been removed and managed appropriately.
If all the actions described above have <u>not</u> been undertaken, explain why:

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Site Assessment/Characterization

This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release?	_____ 20 _____ (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Did the release impact areas not on an exploration, development, production, or storage site?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

Characterization Report Checklist: *Each of the following items must be included in the report.*

- Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- Field data
- Data table of soil contaminant concentration data
- Depth to water determination
- Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release
- Boring or excavation logs
- Photographs including date and GIS information
- Topographic/Aerial maps
- Laboratory data including chain of custody

Incident ID	
District RP	
Facility ID	
Application ID	

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Closure Report Attachment Checklist: *Each of the following items must be included in the closure report.*

- A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)
- Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.
