Mr. Bratcher,

Under the new spill rule a work plan or closure report is due for the above release on 5/5/19. COG has conducted some excavation at the release to eliminate the highly saturated soil. Samples were collected from the excavated area for evaluation. Additional delineation sampling is required and is being scheduled to begin next week. COG is requesting a three month extension until August 5, 2019 in order to complete delineation activities and either submit a work plan or conduct remediation at risk and prepare a closure report. Please let me know if you have any questions.

Thank You,

Becky Haskell

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Mr. Bratcher/Mr. Amos,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

*DeAnn Grant*
