NRM2004938133 STAN 32 STATE 71H @ 30-015-46231

Mr. Littrell,
Your request for an extension to October 29, 2020 is approved.
Thank you,

Victoria Venegas
State of New Mexico

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] XTO- Extension Request - Stan 32 State 71H (Incident ID NRM2004938133)

All,

Pursuant to NMAC Section 19.15.29.12.B., XTO is requesting an extension of the current deadline of August 2, 2020, for submitting a remediation work plan or closure report at the Stan 32 State 71H (Incident ID NRM2004938133). XTO has conducted Electrical Resistivity Imaging (ERI) surveys on the well pad and pasture area north of the pad. The ERI reports are being used to evaluate potential subsurface impacts and guide remediation activities. A Right of Entry (ROE) Permit was submitted to the State Land Office (SLO) on April 27, 2020 to conduct further site assessment. The ROE permit was issued on June 11, 2020. An application for a permit to drill a well was submitted to the New Mexico Office of the State Engineer (NMOSE) on June 16, 2020. The NMOSE approved permit was issued on 6-29-2020. An application for a water monitoring/recovery well easement was also required by the SLO and is currently in process. An extension of time for completion of a remediation work plan or closure report is necessary to provide enough time for the easement application to be processed and to complete additional site assessment activities and remediation work. Based on the good cause shown, XTO requests an extension of the deadline to complete remediation or submit a remediation plan or closure report until November 2, 2020. Thank you. --Kyle
