**Subject:** [EXT] Re: [EXTERNAL] GJSAU 22 Inj. line 2.26.19 work plan - 2RP-5286

Johnny,

Pretty much the same issues as the previous event. SP-1 and SP-2, have not been fully delineated down to 600 mg/l. Actually showing increased chlorides at bottom samples. SP-3 is okay. We will need a Sundry Notice Form 3160-5 for new surface disturbing activities. Need the additional delineation and data on the Probiotic compound treatment, along with the Sundry prior to any authorization.

Thanks
