**Subject:** [EXT] Cimarex Reportable Spill - Caudill South 21 Fee

All,

We had a release yesterday at the Caudill South 21 Fee Battery. The produced water tank developed a hole due to corrosion. We got a vacuum truck out to location to pull water from the tank and a second truck to remove the standing fluid out of containment.

The well is shut in and the damaged tank is isolated/LOTO until we can assess the situation. We will remove the gravel and schedule/request the state to inspect the liner.

**Cause of Spill:** Corrosion  
**Material:** Produced Water  
**Spilled:** 30 Barrels (bbls)  
**Recovered:** 30 Barrels (bbls)  
**Was Spill Contained:** Yes  
**Is Containment Lined:** Yes

### Well Details

**API:** 30-025-37925  
**Well Name:** CAUDILL SOUTH 21 FEE #002H  
**Operator:** CIMAREX ENERGY CO.  
**Pools:** [10830] CAUDILL;PERMO UPPER PENN  
**ULSTR:** L-21-15S-36E  
**Footages:** 2000 FSL & 940 FWL  
**County:** Lea  
**District:** Hobbs

I will submit a C-141 online.

**Reported By:** Robert Quesada  
**Reported By Phone Number:** 4323013170  
**Incident Time:** 2/16/2020 01:30 PM  
**Completed By:** Joshua Jones on 02/16/2020  
**Contractor Involved:** No

#### **Operation**

pumper making rounds

#### **Cause of Spill:** Corrosion

Material: Produced Water  
Spilled: 30 Barrels (bbls)  
Recovered: 30 Barrels (bbls)  
**Was Spill Contained:** Yes  
**Is Containment Lined:** Yes

#### **Description**

Pumper arrived on location to find water in gravel lined containment, upon searching found a hole in the bottom off 500bbl water tank.

#### **Comment**

Called two vacuum and got containment sucked out and tank sucked out gravel was moved back to reveal liner and to serve as a low spot to pull water from. will evaluate further for repair needed
