NDHR1921342505 QUEENIE 15 FEDERAL #001H @ 30-025-40230

Ms. Sanjari,
Marathon's deferral requests to complete final remediation during any future major construction/alteration or final plugging and abandonment, whichever occurs first. Marathon does not believe deferment will result in imminent risk to human health, the environment, or groundwater. The areas requested for deferral are identified on the site map as "BHL1" and "BHL2". The areas have been delineated and documented in the report. At this time, OCD approves this request. The Deferral Request and C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue.
The signed C-141 can be found in the online image data base under the incident #.
Thank you,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
