Larry,

We have received your Workplan/Remediation Proposal for **Incident #NRM2013250166 JG Hare #19**, thank you. This Workplan/Remediation proposal is approved with the following conditions:

- After reviewing the OCD Environmental Map, all the well data within 1/2 mile radius appears to be older than 25 years old. When nearby wells are used to determine depth to groundwater, the wells should be no further than 1/2 mile away from the site, and data should be no more than 25 years old, and well construction information should be provided. If evidence of depth to ground water within a 1/2 mile radius of the site cannot be provided, impacted soils will need to meet Table 1 Closure Criteria for ground water at a depth of 50 feet or less.
- If you feel the depth to groundwater is >100', a shallow borehole can be drilled to 101' allowing for verification of the depth. If water is not visible after reaching bottom-hole and waiting 72 hours, the OCD will accept this as evidence. We would just need a copy of the driller's log.
- When conducting grab samples, please make sure each composite sample is not representative of more than 200 ft2
- Sidewall closure samples will need to be delineated/excavated to 600 mg/kg.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
