---

**Wade,**

We have received your Workplan/Remediation Proposal for **Incident #NRM2015552273 Federal 12-1H Central Oil Tank**, thank you. This Workplan/Remediation proposal is approved with the following conditions:

- This release has occurred in a high karst area and will need to be remediated to the strictest closure criteria of <50' depth to groundwater from Table 1 of the spill rule.
- Contaminated soil will need to be excavated to the first clean (under closure criteria limit) sample point depth, which in this case would be 600 mg/kg for Chlorides.
- If the sample is over 600 mg/kg for Chlorides it hasn't been vertically delineated. Please excavate the following sample points to a depth of:
  - SP1 to 2'
  - SP2 to 2'
  - SP3 to 2'
  - SP5 to 3'
  - SP7 to 2'
  - SP9 to 2'

Please let me know if you have any further questions.

Thank you,

**Robert Hamlet** • Environmental Eng. Tech. III

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
