RE: Incident #**NRM1935840155, NRM2000235975, and NRM2000237294**

**Kalei,**

Your request for an extension to **January 20th, 2021** is approved. This will be the **final extension** for this release. XTO is requesting an extension to the current November 20, 2020 deadline for submitting a remediation work plan or closure report required in 19.15.29.12.B.(1) NMAC for the Remuda South 25 #126H. Three releases were discovered between October 22, 2019 through October 25, 2019 (Incident Numbers: NRM1935840155, NRM2000235975, and NRM2000237294). Drilling operations were ongoing at the Site which prevented XTO from initiating remediation work. Operational updates were provided by XTO, and remediation activities were completed on September 21, 2020, during a brief break in drilling operations. A depth to water boring is scheduled to be drilled to confirm the closure criteria at the Site; however, due to the State Land Office (SLO) access process and New Mexico Office of the State Engineer (NMOSE) well permitting process, drilling of the boring was delayed. The boring is scheduled to be completed November 30, 2020. In order to allow time to drill the depth to water boring and prepare a closure report, XTO requests a 60-day extension of the current deadline until January 20, 2021.

**Subject:** [EXT] XTO- Extension Request- Remuda South 25 #126H (Incident Numbers: NRM1935840155, NRM2000235975, and NRM2000237294)

All,

XTO is requesting an extension to the current November 20, 2020 deadline for submitting a remediation work plan or closure report required in 19.15.29.12.B.(1) NMAC for the Remuda South 25 #126H. Three releases were discovered between October 22, 2019 through October 25, 2019 (Incident Numbers: NRM1935840155, NRM2000235975, and NRM2000237294). Drilling operations were ongoing at the Site which prevented XTO from initiating remediation work. Operational updates were provided by XTO, and remediation activities were completed on September 21, 2020, during a brief break in drilling operations. A depth to water boring is

scheduled to be drilled to confirm the closure criteria at the Site; however, due to the State Land Office (SLO) access process and New Mexico Office of the State Engineer (NMOSE) well permitting process, drilling of the boring was delayed. The boring is scheduled to be completed November 30, 2020. In order to allow time to drill the depth to water boring and prepare a closure report, XTO requests a 60-day extension of the current deadline until January 20, 2021.

Thank you,

**Kalei Jennings**
