Subject: [EXTERNAL] Hornbaker BA 2 (nAPP2125655405) Characterization-Remediation Plan Extension Request

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Good afternoon,

EOG Resources, Inc. respectfully requests an extension to February 1, 2022, for the Characterization/Remediation Plan for the below listed location.

Hornbaker BA #2
nAPP2125655405

The environmental consultant has scheduled a core rig to perform an exploratory boring due to the

need for the determination of depth to groundwater within the area of the site, NMOSE drilling permits were first required before the scheduling of the core rig could be completed. The consultant is scheduled to be performing delineation sampling from December 8 through December 17, 2021, therefore the request to submit the Characterization/Remediation Plan is February 1, 2022, to allow for in depth analysis of results and thorough review of remediation techniques that address the site in the most environmentally friendly and sound methods possible to prevent harm to human health or the environment.

Thank you,

Tina Huerta

Regulatory Specialist
