---

Good afternoon,

While I was doing inspections yesterday, I came across this leak. Operator's name is Earthstone.

Notified Ben Badger pumper got to location quickly and isolated the leak.

Location is Daisy Duke 31 State com #3H. API # 30-015-42224. Notified Ben Badger pumper got to location quickly and isolated the leak.

An abandon line running from the free water knockout to containment valve should have been closed but was cracked open. Fluid and gas leaked into the containment and over ran. Spilling onto the ground west and south of containment towards fence east down fence line and puddled up. Approx. 30X60 area.
