13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

To abandon the existing non-commercial Morrow zone and re-complete to the Atoka formation. Set CIBP at 10,350' (Morrow perms @ 10,446 - 10,464'). Dump bail 5 SX cmt on plug. Perforate Atoka from 10,110' - 10,120' & 10,135' - 10,150'. Acidize Atoka w/2000 Gals 15% HCL. Flow test well. If non-commercial well, to be P&A'd (procedure to follow).

PROPOSED OPERATION TO BEGIN JULY 1, 2004

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

**Subject:** Illinois Camp # 21

Dear Mr. Repasky,

In review of the above noted well, please resubmit on a current form your intention for a re-completion to the Atoka on a C-101 and C-102. Current forms are available on our web site.

<http://www.emnrd.state.nm.us/ocd>

Any re-completion to a different formation needs to be submitted on the appropriate form.

I don't have an e-log of the noted well, however are you certain that the proposed perms are in the Atoka and not the Morrow Clastics?

Also, please submit the correct number of forms as noted in the upper portion of the form.

Please call if you have any questions

505-748-1283

Bryan Arrant
