17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well was drilled to total depth of 7400' in the Mississippian without encountering any significant show of oil or gas. On December 21, 1974, pursuant to telephone conversation with Mr. Knauf, we plan to plug and abandon this well with heavy mud between all plugs as follows:

50 sack plug 6650-6500' at top of Pennsylvanian (Morrow)  
50 sack plug 5150-5000' at top of Pennsylvanian (Cisco)  
50 sack plug 3600-3450' at top of Abo.  
35 sack plug 2800-2700' below water zone encountered at 2570.

A dry hole marker is welded to 8-5/8" casing at surface.
