13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BLA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

To final plug and abandon this non economic well bore.

On August 17, 2000 we set a 7" CIBP @ 2815' and dumped 35' of cement on top to shut off a water flow as per emergency verbal approval from BLM's Alexis Swoboda. The top of the cement plug is 2815' inside 7" casing. The top of cement is 2400' outside 7" casing. PPRESNT WELL CONDITION IS SHOWN ON ENCLOSED WELL DIAGRAM.

WE WILL NOW COMPLETE PLUGGING AS FOLLOWS:

Perf @ 300' thru both casing strings and pump sufficient cement into 7" & 8 5/8" annulus and behind 8 5/8" to circulate cement to surface. If unable @ 300' we will perf @ 450' approx. and circulate cement in the annulus.

The surface location restoration will be done to the BLM requirements.

ENTERED IN
AFMSS

Approved as to plugging of the well bore.
Liability under bond is retained until
surface restoration is completed.
