ODD-ARTESIA

Dear Mr. Arrant:

Please find enclosed an original and four copies of Form C-103 for the downhole commingling of production from the Tansill Dam; Atoka, East and the Carlsbad; Morrow, East pools in the referenced well. When the well was recompleted to the Atoka pool in April, 2004, we thought that all the new perforations belonged in the Atoka formation. However, according to your instructions, the upper perforations in the new recompletion are to be considered producing from the Atoka, and the lower perforations are to be considered producing from the Morrow. Permission to downhole commingle production from the two pools was granted 7/2/04 under DHC-3296. Forms C-105 and C-104 for both pools were filed with your office on 10/8/04. Please note that no pit was used during the recompletion procedure.

If you need further information, please call me at (903) 561-2900.

Yours truly,

Janet Burns
Reg. Tech.
