The IB "32" State No. 6 is a directional well drilled from federal acreage on UL "L", Section 33, T-21-S, R-24-E.

Marathon requests that NMOCD Order PLC- 140 be amended to include the No. 6 well. Production from the well is being sent to Station 132 Satellite where gas is separated, metered, and sent to the Indian Basin Gas Plant via the loop line system. The oil and water are metered separately, recombined and sent to the EIB Central Production facility. Oil and water are then separated and oil is sold via the last units at the facility. Please see the attached diagrams and letter to the NMOCD's Santa Fe office.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐ , a general permit ☐ or an (attached) alternative OCD-approved plan ☐
