13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Bass' Poker Lake Unit Well #188 was spudded at 10:00 am on 10/15/04. 12-1/4" surface hole was being drilled when lost returns were experienced at 250'. LCM pills were pumped without returns and dry drilling began. At the first connection, TD 283', the hole became tight and packed off (no circulation around the bit). The bit was worked through tight hole to 200'. A freepoint was run and the pipe backed off at 85'. Subsequent jarring on the fish did not get any further movement; thus, the pipe was again backed off at 85'(TOF) and 200 sx of cement was spotted from TOF to 4' below GL. The well bore will be moved 36' to the south where a 17-1/2" hole will be drilled to the redbeds at 150' and 13-3/8" casing (conductor) will be set and cemented. A 12-1/4" hole will then be drilled to the original surface casing setting depth of 675'.

14. Thereby certify that the foregoing is true and correct.
