12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work)

SEE RULE 1103 For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

As required by OCD Rule 118 (Hydrogen Sulfide Gas) the following is submitted:

(1) Plat of wellsite with proper signage.

(2) Copy of public roads and road to wellsite.

The Sunfish State #1 has a 300 PPM concentration. There is no public area or public road within the exposure area.

The calculation for the radius of exposure is as follows:

$$X = [(1.589) (.0003) (9,000,000)]^{0.6258} = 188 \text{ Feet}$$

Therefore no H2S contingency plan is required.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
