BARRANT	<p>30-015-3384c</p> <p>Please be more descriptive on your plan of setting the surface and production strings of casing in the comment section which we discussed yesterday. Also, I cannot issue an API on any well until we receive either a h2s contingency plan per NMOCD Rule 118 providing such a plan meets the area s requirements. I would suggest looking at one of the following APD for a go by for approval. For your covenience API # 30-015-33632 would be a good example. Thanks Bryan Arrant</p>	12/10/2004
