13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed, or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please not that this sundry applies to this API # and crosses the following leases:
02884, 02887 B&D, 071988B, & 28881

BOPCO, L.P. respectfully notifies the following:

Accepted for record - NMOCD

Our completion group will do the following:

A CBL will be run from 6988' to TOC of second stage to determine where the TOC is located on the first stage and second stage cement job of the second intermediate casing string. This is due to cement not circulating on both stages. Want to validate where cement stage top is for second stage even though a temperature log run on 5/13/2011 showed cement top to be 3900' From there

Contact the BLM on Call Engineer (575-700-2779) with results of CBL prior to remedial work.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #108715 verified by the BLM Well Information System

For BOPCO LP, sent to the Carlsbad

Committed to AFMSS for processing by WESLEY INGRAM on 05/20/2011 (11WWWI0024SE)

Additional data for EC transaction #108715 that would not fit on the form

32. Additional remarks, continued

remediation for the second stage job will be decided. We will either pump down the backside or perforate the 7" casing.

The cement planned to be pumped is Econo Cem + additives at 12.6 ppg and 2.03 cu ft/sk.
