NATURE OF RELEASE

Type of Release <b>Produced Water/Oil</b>	Volume of Release <b>Oil 20 bbls</b> <b>Prod Water 60 bbls</b>	Volume Recovered <b>Oil 20 bbls</b> <b>Prod Water 40 bbls</b>
Source of Release <b>Oil Tank</b>	Date and Hour of Occurrence <b>16Aug14</b>	Date and Hour of Discovery <b>16Aug14 1200 hrs</b>
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? <b>Jim Amos</b>	
By Whom? <b>Zach Thomas</b>	Date and Hour <b>16Aug14 at 1200hrs</b>	
Was a Watercourse Reached? Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. <b>N/A</b>	
If a Watercourse was Impacted, Describe Fully.* <b>N/A</b>		
Describe Cause of Problem and Remedial Action Taken.* <b>Dump on separation equipment hung open sending a high volume of gas and fluid to production tank causing tank to overrun. Upon pumper arrival, the well was shut in at the well head to stop the release. A local contractor was dispatched and used a back-hoe to conduct initial work to stop the spreading of fluids on location. The material was stockpiled.</b>		
Describe Area Affected and Cleanup Action Taken.* <b>The impacted area was on the pad and an overspray area to the south off the edge. A local contractor used a pressure washer with fresh water and Micro Blaze to clean the vegetation as well as to clean the affected tanks and equipment inside the containment. The impacted area on the pad was excavated to depths of approximately 1.5'-2.5'. The area was divided into three sections for sampling purposes. Soil samples were collected and lab analysis conducted. Sections 1-2 had contaminate levels at or below closure levels and Section 3 had elevated chlorides and further excavation was conducted. Confirmation samples were also obtained at Section 3 at 3.5' and 4.5'. All lab results were presented to NMOCD's Mike Bratcher requesting closure approval. Closure approval was granted and the area was backfilled with fresh caliche obtained from the downsizing operation being conducted on the location. All impacted soil was transported to a division approved disposal facility.</b>		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
