Describe Cause of Problem and Remedial Action Taken.\*  
The well was shut in and the stuffing box packing was replaced.

Describe Area Affected and Cleanup Action Taken.\*  
Approximately 7250 sq. ft. of caliche well pad was affected by the leak. Initial heavily saturated soils were removed from the surface of the impacted area. The site was excavated to 1.5 ft. below ground surface. Soil samples were collected from the excavation bottom. The samples were field screened and submitted to a commercial laboratory for chloride and TPH confirmation. The site was backfilled with caliche and the area was dressed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
