Describe Cause of Problem and Remedial Action Taken.*

The water transfer line from the Barclay 11 Fed 1 SWD to the Todd 13 Fed 2 injection well developed a leak resulting in a spill of 50BBLs of produced water.

Describe Area Affected and Cleanup Action Taken.*

The impacted area was excavated to a depth of at least 1-foot below the transfer line approximately 350-feet along the transfer line approximately to a depth of 4-feet bgs. All the excavated material was hauled to an NMOCD approved solid waste disposal facility. The excavation was then backfilled with sand from a BLM sand pit located on Red Road The disturbed are was re-contoured to match the surrounding terrain and seeded with BLM seed mixture for the Lesser Prairie Chicken habitat.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
