A valve was in the wrong position causing the oil tank to overflow. Place the valve in the correct position.

Describe Area Affected and Cleanup Action Taken.*
This release occurred within a lined facility. Vacuum trucks were dispatched to remove all freestanding fluids. Concho had the free fluids and any contaminated material inside the lined facility removed. The liner has been cleaned and returned back to normal operations.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
