Subject: C-144 re-submission: MOGI - Jawbone St Com temporary pit
Attachments: Revised_C144application.pdf

Dear Mr. Billings and Mr. Bratcher:

Please find the attached re-submission of the C-144 application package for Murchison's Jawbone temporary pit. We believe we have incorporated all of OCD's requested information including:

- Murchison agrees to solidify the cuttings using fly ash or CKD
- A post-closure erosion control plan from Pettigrew that includes monitoring
- Cross-sectional survey to confirm that cuttings will be buried ≥ 4 ft below grade

We have included a new cover letter to reflect the timeline since the original submission in Feb., and the materials above follow the letter. Otherwise, the remainder of the application is identical to the original submission.

Please let me know if you have any questions or can assist your review in any way. Murchison looks forward to beginning closure. Thank you for your help.
