*While performing the Intermediate cement job at 18:30 on 9/12/11, H2S sensor #1 on the rig floor went off registering 10ppm. No other sensors including personal H2S monitors registered any readings. The H2S monitoring system company, Indian Fire and Safety, were called and gave the all clear at 21:30 after having scanned for H2S. The following day at 14:30 while Indian Fire and Safety were actually onsite for an inspection the same sensor again raised an alarm, the sensor was checked by Indian Fire and Safety and it was found to be faulty and replaced.
