CROOKED BILL FEDERAL #1

430' FSL & 330' FWL

SECTION 6, T. 9-S, R. 28-E

CHAVES COUNTY, NEW MEXICO

## **DESIGN PLAN**

- We will design the closed-loop system to contain all liquids and solids and prevent contamination of fresh water and protect public health and the environment.
- We will stockpile the available topsoil for use as the final cover at the time of closure.
- A 12" x 24" sign will be provided in accordance with Sub. C of 19.15.17.11.
- A surrounding perimeter fence will be installed around the entire well site.
- Drilling cuttings will be blown into and maintained in a haul-off bin.

## **OPERATING AND MAINTENANCE PLAN**

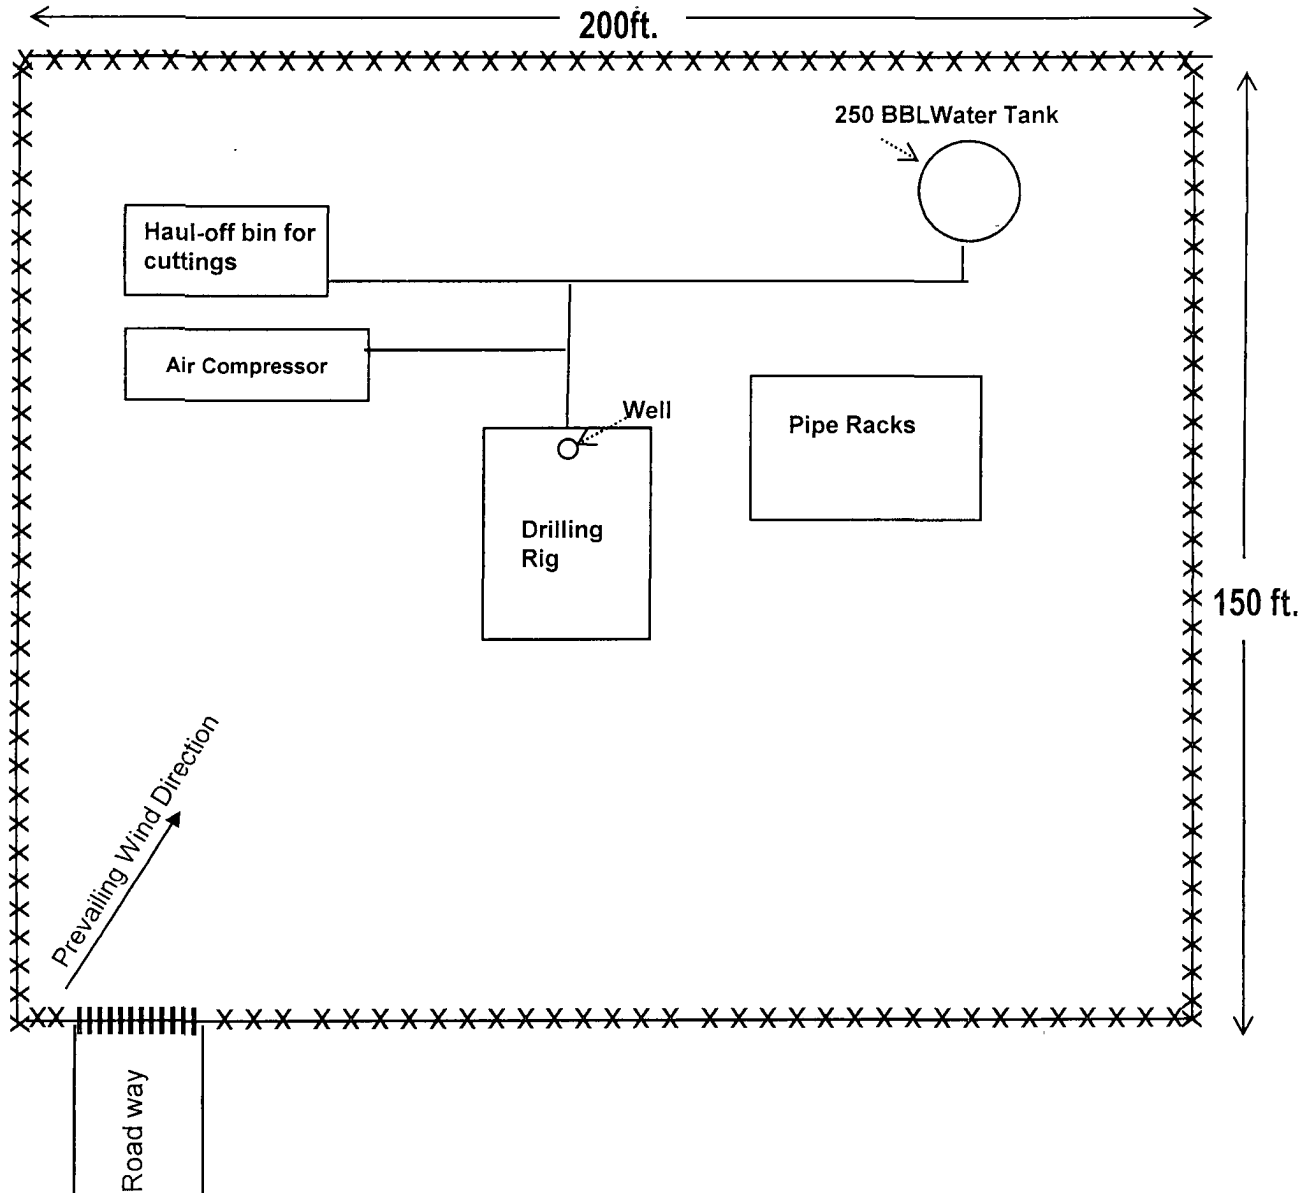

- We will operate and maintain the closed-loop system to contain all liquids and solids and prevent contamination of fresh water and protect public health and the environment.
- The equipment will be continuously monitored during operations.
- Should any leaks develop in the closed-loop system, we will remove all liquids and notify the BLM's Field office with 48 hours and we will immediately repair or replace the equipment.
- Drilling cuttings will be blown into a haul-off bin.
- All contaminated drilling fluids and cuttings in the haul-off bins will be transported to an approved disposal facilities (Gandy-Marley Landfarm, Permit #NM-0010019).

## **CLOSURE PLAN**

- Once we are no longer using the area associated with a closed-loop system, we will reclaim all areas associated with the closed-loop system to a safe and stable condition that blends with the surrounding undisturbed area in accordance with OCD rules and regulations.
