13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Fasken Oil and Ranch, Ltd. Respectfully requests permission to extend the North end of the planned location 35', for a total length of 85' from the wellhead instead of the planned length of 50' from the wellhead. This will allow adequate room for the closed loop fluid system that will be utilized on this well. This area is all fill, no earth will be dug up. This area will be reclaimed once drilling and completion activities are finished, along with the original area of the pad that was planned to be reclaimed. The attached diagrams illustrate the new dimensions of the pad and the revised area that will be reclaimed, including the new extended portion of the pad. This action was discussed with Tanner Nygren, BLM Natural Resource Specialist on 1-4-2012.
